

Flow rate and flow totals are saved in the flow meter's on-board data logger and can be read off the display. The on-board modem sends the information directly to the WaMSS Scada, which compiles reports and automatically emails them to your pc, tablet or cell.

Mag Meters with GPRS telemetry operating in South Africa

You always have reliable flow, billing and maintenance information at your fingertips.

With battery powered mag meters you don't under-bill and don't give away water for free!

Isoil's battery powered mag meters have no moving parts so they are extremely reliable. They are not affected by wear, corrosion, debris build-up or catastrophic failure. So there is no under-reading as with mechanical meters.

- Accuracy: $\pm 0.4\%$
- Battery Life: typically 3 to 6 years
- Seamlessly integrate into the WaMSS Water Management Scada
- Certified to: ISO9001; ISO EN17025; OIMLR49 and MID1001.
